

REISSUE APPLICATION DECLARATION

As the below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am an original, first and joint inventor of the subject matter which is described and claimed in Letters Patent No. 6,329,213, granted on December 11, 2001, and for which invention I solicit a reissue patent on the invention entitled METHODS FOR FORMING INTEGRATED CIRCUITS WITHIN SUBSTRATES, the specification of which is attached hereto.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims.

I hereby state that I have reviewed and understand the contents of the specification, including the claims, as amended by the accompanying Amendment.

I acknowledge the duty to disclose information known to me to be material to patentability as defined in Title 37, Code of Federal Regulations §1.56.

STATEMENT OF INOPERATIVENESS OF ORIGINAL PATENT:

I verily believe the original patent to be partly inoperative or invalid by reason of my having claimed less than I had a right to claim in the original patent. All errors which are being corrected in the present reissue application, up to the time of the filing of this reissue declaration, arose without any deceptive intention on my part.

CONCURRENT PROCEEDINGS:

The patent for which reissue is requested is not and has not been involved in any concurrent or prior interferences, reissues, reexaminations, or litigations.

IDENTIFICATION OF THE ERROR:

The error which results in the patent being partially inoperative or invalid includes a failure to claim a method of forming a device that is not necessarily a radio frequency communication device. More particularly, one instance of error is found in Claim 1, which is unduly limited, in part, by being limited to a radio frequency communication device. This error in Claim 1 is addressed by the accompanying reissue application by presenting Claim 19 which tracks issued Claim 1, but which omits "radio frequency communication." Another error which results in the patent being partially inoperative or invalid includes a failure to claim a method of forming a device wherein the antenna is not necessarily a loop antenna. More particularly, one instance of error is found in Claim 1, which is unduly limited, in part, by being limited in reciting "wherein the antenna is a loop antenna which...." This error in Claim 1 is addressed by the accompanying reissue application by presenting Claim 19 which tracks issued Claim 1, but which omits "is a loop antenna which." Other claims include additional errors through inclusion of other limitations that are not included in claims added in the accompanying Amendment. Thus, this is a broadening reissue application.

Every error in the patent which was corrected in the present reissue application, and which is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicants.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statement may jeopardize the validity of the application or any patent issued therefrom.
